ELECTRIC WATER HEATER  
and VENTILATION

# CATA WORLDWIDE

## In over 80 countries

Manufacturer for home appliances, **Cata** was founded in Torelló in 1947. It is a leading brand and a pioneer in extraction business.

Its extensive product catalogue includes the most complete and innovative range of Domestic and Professional Extraction.

Based in Torelló, in the province of Barcelona, **Cata** also owns factories in Torelló (Spain), Sao Paulo (Brazil) and Xiao Lan and Shunde (China) and is in constant international expansion thanks to its team of professionals committed to the manufacture and marketing of an extensive range of products.

**Cata** has reached its position as leader in the extraction market thanks to its great capacity to innovate and its ability to anticipate market needs. Over recent years, it has undergone significant growth in both the Spanish and international markets, based on excellent quality and a high degree of competitiveness in all its products.

**Cata's** commitment to quality has been borne out by the highest certification, ISO 9001, awarded by the Bureau Veritas Quality International and accredited by the Dutch Council for Accreditation. These international standards ensure a maximum level of quality in the design and manufacture of all products. Likewise, **Cata** products respond to technical and safety regulations and have been obtained the European approvals of the C. C. A. (Cenelec Certificate Agreement). As a result, **Cata** is currently one of the leading extraction companies in the world.

# ELECTRIC WATER HEATER (EWH)

Reliability & efficiency  
Installation versatility  
High quality components  
Security

## Reliability & Efficiency

By using double resistances circuit, Cata's new EWH offer greater reliability and guarantee proper operation. They incorporate the sheathed thermostat, extending the life of the component. In addition, their best polyurethane insulation foam free of CFC and HCFC of uniform density and perfect adhesion, guarantee minimum heat loss, a much smoother operation, allowing it to be one of the most efficient EWH in the market.

## Installation versatility

All the models that appear in the catalog (except for TS-30 SL) offer two installation possibilities: vertical and horizontal installation. Thanks to the position of heating elements, water heaters can be installed horizontally or vertically, depending on the requirements of each user.

## High quality components

The range of Cata electric water heater incorporate an outer rolled steel covering with epoxy paint protection, which prevents oxidation and gives it an IP24 protection rating. Inside it has high efficiency insulation, ensuring minimum heat loss. All models incorporate magnesium anode, guaranteeing perfect electrochemical protection. They also have sheathed heating elements with double protective enamel and independent functioning, which can be replaced without draining the water tank and allowing the heater to continue operating even if one of the heating elements is not working.

## Security

We offer products with electrical safety: through two thermostats, one for temperature control and another for security, which switches off the water heater in case of failure of the first one; and hydraulic safety, which prevents that the pressure inside the unit exceeds the nominal design pressure.

## European standard for eco-design (Dir. 2009/125/EC) and energy labeling (Dir. 2010/30/EC)

### Why this new legislation?

To help with climate change and to reduce energy consumption and natural resources of the European Community and its member countries. These rules have been developed for eco-design of products (ErP Directive) and regulations for energy labeling (Energy Labelling Directive) thereof in an effort to achieve an improvement of products and the natural resources used in its production and the energy resources used in its operation.

### When?

Both the ErP Directive and Energy Labelling Directive will only be used for products launched on the market beginning on 09.26.2015. Products purchased before or already in the point of sale or stores distributors may continue be sold and installed though not meeting the new requirements.

### Who is affected by these regulations?

We, the manufacturers, that must follow the established policy and begin to develop our products according to the ErP Directive, so as to improve its operating performance, in order to remove less efficient technologies from the market and, so that to be visible for the customer the products have to be labeled according to the Energy Labelling Directive, which also defines the responsibilities of suppliers and sellers.

The installation technician. They should know which products follow the new directives of Eco-Design and inform customers about the reasons of the usage of more efficient appliances. In case of installing mixed heating systems the energy labeling for complete systems must also be elaborated (including boiler, solar support, accumulator, etc.)

### And what about electric heaters?

According to the specific regulations for appliances that produce hot water (Reg. 814/2013), it is necessary to meet efficiency minimum requirements for appliances that can be produced and labeled with EC labeling. They also have to have an energy label and a data sheet as explained in Reg. 811/2013. The initial date to include this information in appliances is September 26, 2015.

### Cata guarantees:

- All our electric water heater obey the directive.
- Detailed technical and normative information for our customers.
- Customer service available for any questions.

### How do I read the energy label on my Cata electric water heater?

## TS-30 SL

## EWH

- Round outer shape
- Vertical installation
- **Fits into kitchen furniture**
- **Independent sheathed heating elements 2 x 800 watts**
- **Steel tank with vitrified titanium enamel at 850°C**
- **Adjustable thermostat with front control**
- Heating indicator
- Magnesium anode
- **High efficiency insulation 25mm**
- Sheathed thermostatic sensor
- Safety thermostat
- Insulating sleeves
- 10bar safety valve with drain device
- Epoxy paint coated exterior
- 30L capacity
- Energy class: B

736mm high x 320mm wide x 327mm deep

PIR: INFRA RED SENSOR ACTIVATED BY PRESENCE

- **Perimeter extraction** system.
- **Glass cover.**
- Available models with ambient light and infra-red sensor activated by presence (ø100).
- **High-performance plastic housing and impeller.**
- **Temperature and humidity display** (available on humidistat model).
- Backdraught shutter (accessory).
- Fitted with 220-240 50/60Hz motors (110-127V 60Hz on request), IP-44 protection and insulation class B as standard.
- **Minimum sound level of 17dB (according to the model)**
- 2-speed function (humidistat version only), to be selected prior to installation between continuous or NON continuous working.
- 1st speed: slow speed for continuous extraction.
- 2nd speed: activates when light is switched on, by activating the humidistat or the timer.

## REMOVABLE GLASS FRONT

### EASILY REMOVABLE

Easy and speedy removal of the cover using a single tool (included in the packaging) which is also used to adjust the timer (GT and GTH version) and the humidistat (GTH version).

### EASY TO CLEAN

Extra-flat glass cover that is easy to clean just by running a damp cloth over it.

# IN-LINE DUCT FANS

In-line mixed flow fans with high performance air flow capacity and low noise level.

## DUCT IN-LINE

EASY  
MAINTENANCE

2 SPEED

3 SPEED

DUCT IN LINE 200 STANDAR

IP-44

### Fan:

- Housing polypropylene plastic.
- Easy accessible motor due to the motor support, which can be dismantled without interfering existing duct system. (1)

### Motor:

- Asynchronous 1, 2 and 3 speeds motor, self-lubricating bearings for life.
- Protection **IP44** (not **DUCT IN-LINE 100/130**) insulation Class **B**, and thermal cut out, ambient temperature max. 60°C.
- External terminal box.
- 60Hz versions on demand.
- Speed control possible (not timer versions).
- **TIMER** version models adjustable from 3 to 15 minutes.

### Impeller:

- High performance and very silence helicocentrifugal mixed flow, made in ABS plastic.
- **DUCT IN-LINE 100/130** with centrifugal impeller.

### Accessories:

- Fixed plastic grills.

# Centrifugal extract fan for kitchens. 600 PLUS 2V / GS 600

- High air flow capacity.
- Metal housing and high performance plastic impeller.
- Plate to collect grease.
- Easy to install and clean.
- The 600 Plus model incorporates a 2 speeds switch that can be wall mounted.
- Metallic grease filter in GS 600 PLUS and protection guard in GS 600.
- Energy class: C

# PERFORMANCE CURVES

# COMPREHENSIVE VENTILATION SOLUTIONS

## WHAT WE OFFER

Integral ventilation solutions. Reliability, Quality, Innovation and Design. Proven experience in ventilation. International industrial capacity. Global service. And most importantly to our customers: **BENEFITS AND ADVANTAGES**

## COMPREHENSIVE VENTILATION SOLUTIONS:

**CATA** provides subscribers, wholesalers and professionals from the sector an extensive product range, which will allow them to choose the most suitable model for every ventilation case or need, at both domestic and industrial level, and now also **models and ranges to comply with the Technical Building Code (CTE), in accordance with Royal Decree 314/2006, dated 17th March 2006.**

## RELIABILITY, QUALITY, INNOVATION AND DESIGN

These concepts are basic and mandatory for **CATA** and are the main basis for all our products. For this reason, a qualified team of engineers assisted by the most modern design systems work to ensure the highest levels of quality and innovation to offer highly reliable ventilation products manufactured according to the **ISO 9001/2000 standard Management System.**

## PROVEN EXPERIENCE IN VENTILATION

A pioneer in the manufacturing of fans, **CATA** has over 60 years' experience in ventilation, strengthening its position as a world leader thanks to the export of proprietary technology and differentiated products.

## INTERNATIONAL INDUSTRIAL CAPACITY

**CATA** has a very important industrial asset, with several production centres around the world equipped with the most modern technology and machinery to be able to offer efficient and competitive distribution of our products and components.

## GLOBAL SERVICE

**CATA** has a multicultural team with a high level of training and a clear customer care and service orientation. In addition, to offer a better service, we have logistics and distribution centres and subsidiaries around the world.

## AND MOST IMPORTANTLY TO OUR CUSTOMERS: BENEFITS AND ADVANTAGES

These are the main aims that the **CATA Ventilation Division** wishes to offer the distributors, customers and professionals in the sector. For this reason, we work and renew our efforts daily to ensure that these objectives are possible.

# Concepts

## BASIC VENTILATION CONCEPTS

### WHAT IS VENTILATION?

Ventilation is understood to be the replacement of a portion of air which is considered undesirable (polluted), by another that provides an improvement both in terms of purity, and of temperature, humidity, etc.

### FUNCTIONS

To maintain the air in an enclosure under suitable conditions of temperature, humidity, pressure, speed and degree of pollution to ensure the health and wellbeing of people, or living beings.

### FLOW RATE

This is the amount of air displaced in a given unit of time. (The flow given in the technical specifications is at free discharge, in other words, with no pressure loss). Flow is shown as Q and is usually expressed in m<sup>3</sup>/h, although it is also commonly expressed in m<sup>3</sup>/min, m<sup>3</sup>/sec, l/s, C.F.M

$$1\text{m}^3/\text{h} = 3,6 \text{ l/s}$$

$$1,7 \text{ m}^3/\text{h} = 1 \text{ C.F.M}$$

The **FLOW RATE** and the section are related as follows:

$$Q = V * S = \text{m}^3/\text{h}$$

$$V = \text{Air speed (m/sec)}$$

$$S = \text{Section (m}^2\text{) of the duct}$$

$$S = \frac{d^2 * \Pi}{4}$$

### WHAT IS PRESSURE?

It is the pushing force per surface unit that air needs to circulate and overcome the resistance of the system (pressure losses).

Pressure is given in: mmH<sub>2</sub>O and Pa

$$9,8 \text{ Pa} = 1 \text{ mmH}_2\text{O}$$

### THERE ARE THREE TYPES OF PRESSURE:

**Static Pressure (Pe):** This is the force of the air in all directions on the walls of the tube, in a perpendicular direction to them.

**Dynamic Pressure (Pd):** Is the force that accelerates the air from zero to the velocity of the system. It is manifested only in the direction of the air.

There is a formula that links dynamic pressure and speed:

$$Pd = (V / 4,04)^2$$

### Speed Table with its Dynamic Pressure (table 3)

Speed (m/s)	Dynamic Pressure mmH <sub>2</sub> O
1	0.06
2	0.24
3	0.55
4	0.98
5	1.53
6	2.20
7	3.00
8	3.92
9	4.96
10	6.12
11	7.41
12	8.82
13	10.35
14	12.00
15	13.78
16	15.68
17	17.70
18	19.85
19	22.11
20	24.50
21	27.01
22	29.65

**Total Pressure:** This is the sum between the static pressure and the dynamic pressure  $P_t = P_e + P_d$

### WHAT IS NOISE?

It is the audible sound, that is propagated through the air and which is unpleasant to the receiver.

The **Sound Pressure (Lp)** level is what we really hear and it varies according to the premises and the distance between the source of the noise (extractor or fan) and the receiver.

The **Sound Power (Lw)** level is the amount of sound energy of a sound source (extractor or fan) every second and it is constant, in other words, it does not vary according to the premises or the distance from the sound source.

# Concepts

## BASIC VENTILATION CONCEPTS

Noise	dB	Examples
		Thunder
DEAFENING	120	Cannon fire
	110	Steam whistle
VERY STRONG	100	Train in a tunnel
	90	Street with dense traffic
	80	Noisy factory
STRONG		Noisy office
	70	Medium-sized workshop
	60	Radio with the volume up high
MODERATE	60	Large shop
	50	Office
GENTLE		Public library
	40	Country road
	30	Scrunching up paper Quiet conversation
VERY GENTLE	20	Peaceful church
	10	Silent night
	0	Hearing limit

### HOW TO CHOOSE A FAN

You need to know the following parameters:

- Output
- Pressure
- Sound level
- Type of Electricity Supply

**Output** ( $Q$  m<sup>3</sup>/h): You have to determine the necessary flow according to:

1. The recommended renewals with regard to the volume of the premises in m<sup>3</sup> and the activity there.

$$Q = m^3 * \text{Renow/h}$$

### RENEW./HOURLY TABLE

Result of Health and Safety studies/Experience

#### INDUSTRIAL PREMISES

Noxious atmospheres	30-60
Goods deposit	3-6
Cast-iron	20-30
Industrial laundry	15-30
Machine room	20-30
Workshop (general)	8-10
Workshop with kilns	30-60
Tooling workshop	5-10
Paint workshop	30-60
Welding workshop	15-30
Dry cleaner	20-30

#### SERVICES SECTOR AND PREMISES

	NR/h
Classroom	2-4
Bank	3-4
Bar-café	10-12
Library	3-5
Cinema-theatre	10-15
Industrial kitchen	15-30
Canteen	5-10
Recording studio	10-12
Garage	6-8
Gym	6-12
Entrance hall	3-5

Baker's	20-30
Restaurant	5-10
Dance hall	6-8
Conference room	8-12
Hairdressing salon	10-15
Meeting room	4-8

2. The recommended renewals with regard to the number of people that there are in the premises.

$$Q = n^{\circ} \text{ person} * m^3/h$$

Normal activity with no smoking	29 m <sup>3</sup> /h per person
Normal activity with smoking	58 m <sup>3</sup> /h per person
Light physical activity	45 m <sup>3</sup> /h per person
Industrial warehouses and premises	60 m <sup>3</sup> /h per person

# Concepts

## BASIC VENTILATION CONCEPTS

3 ■ When localised extraction is required in the place where the contaminating source is, the flow (**Q**) will be determined taking the following into account:

- Surface area of the hood
- Speed of catchment
- Speed of transport by the recommended renewals system with regard to the number of people that there are in the premises.

$$Q = 3.600 \cdot V \cdot S = \text{m}^3/\text{h}$$

**Q** = Necessary air flow (**m<sup>3</sup>/h**)

**V** = Speed of catchment (**m/h**)

**S** = Hood or ducting section (**m<sup>2</sup>**)

LOCALISED EXTRACTION GUIDE COOKER HOODS			
Hood Class	Speed Catchment in m/sec On hood surface	Calculation per m2 of surface area of the hood	Speed of transport m/sec
4 sides open	from 1 to 1,2 m/sec.	3.500 to 4.500 m <sup>3</sup> /h	from 6 to 10 m/sec.
3 sides open	from 0,85 to 1 m/sec.	3.000 to 3.500 m <sup>3</sup> /h	
2 sides open	from 0,75 to 0,85 m/sec.	2.700 to 3.000 m <sup>3</sup> /h	
1 side open	from 0,5 to 0,75 m/sec.	1.750 to 2.700 m <sup>3</sup> /h
